

LAST NIGHT.  
ROYALTY THEATRE,  
WELL-CLOSE-SQUARE.

EIDOURANION:

O R,

Large *TRANSPARENT ORRERY.*

On this elaborate and splendid Machine, which is 15 Feet Diameter, and has been exhibited Five Seasons in the Theatres Royal Haymarket and Covent-Garden,

*Mr. WALKER, Jun.*

WILL DELIVER HIS

Astronomical Lecture,

This Evening, SATURDAY, *April 13.*

SCENE I. Exhibits the Earth in Annual and Diurnal Motion. Day, Night, Twilight, long and short Days, in this Scene are so obvious, that a bare Inspection of the Machine explains the Reasons of these Phenomena, even to those who may have never thought on the Subject.

SCENE II. Consists of the Sun, the Earth, and the Moon. The Intention is to shew the Cause and Effect of the Moon's Phases, or different Appearances, her Eclipses, and those of the Sun.

SCENE III. Shews the threefold Motion of the Earth, viz. That on its Axis, to produce Day and Night; that round the Sun, to produce the Seasons; and that round the Center of Gravity with the Moon, to produce Spring and Neap Tides.

SCENE IV. Exhibits every Planet and Satellite in Annual and Diurnal Motion at once. A Comet descends in the Parabolic Curve, from the top of the Theatre, and turning round the Sun, ascends in like Manner, its Motions being accelerated and retarded, according to the Laws of Planetary Motion.

Every Motion in this complex Variety, seems without Cause or Support! The sublime and awful Simplicity of Nature is daringly imitated;—and the GEORGIUM SIDUS, or new Planet, the Appearance of the fixed Stars, (and other recent Discoveries, made through a Telescope, magnifying 600 Times, by Dr. *Herschell*) &c. are all interwoven in this Lecture and Exhibition, which is assisted by a great Variety of auxiliary Scenes.

The CELESTINA STOP being a Sister Invention of Mr. *Walker's*, a few Notes will be introduced on that Instrument in the Intervals of the Lecture.

Doors open at SIX, and the Lecture begins at SEVEN.

BOXES 5s. PIT 3s. First GALLERY 2s. Upper GALLERY 1s.

TICKETS and Books of the Lecture may be had of the Box-keeper, at the Theatre, in the Week of the Lecture, where Places may be taken; and of Mr. *Walker*, No. 27, *George-street, Hanover-square.*
